

### Convenient Wireless Operation

Effortlessly control your lift, ShoreScreen, and lights from your boat or shore with a single remote that automatically locks to prevent unintended use. For full control, the ShoreStation app connects instantly via Bluetooth—no Wi-Fi or setup needed—so you can manage everything right from your phone with ease.

### Worry-Free Landing

Bring your boat to a perfect position every time with ShoreStation's boat guides and bow & motor stops, which help prevent you from overrunning the lift.

### Solar or Plug-In Charging System

Power your lift with a NOCO charger or with clean, free solar power, keeping your battery fresh and optimized.

# Simple and swift from launch to lift.

*The ease of speed*

*Sure, a ShoreStation lift is one of the fastest on the market, but it's more than that. The unmatched speed, versatility and dependability translates to more time on the water.*

**SEE THE LIFT IN ACTION**

Raise and lower your ShoreStation Hydraulic Lift and ShoreScreen with this handy remote transmitter or right from your phone with the ShoreStation app.

*From simple to sophisticated. Overhead to under deck.*

# ***The options are endless!***

## **Deck Over**

ShoreStation's deck over lift delivers premium performance while maintaining a flush, walkable surface that integrates with your dock. With powerful hydraulic operation, it's built for convenience, aesthetics, and lasting durability in any environment.

## **Under Deck**

A clean, open slip with powerful, hidden performance. The under-deck lift mounts entirely beneath the dock, leaving no visible lift components above the deck. Ideal for premium docks where aesthetics matter, it delivers smooth hydraulic operation with an unobstructed boarding area.

## **Deck Level**

Strength you can see. With lift tubes positioned at deck height, this system offers easy access, visible reliability, and a clean, integrated look. It's a perfect blend of performance and simplicity—designed for unobstructed views and seamless dockside boarding.

## **Low Profile**

A sleek solution with added clearance. The lift tubes sit just above the dock, offering the same unobstructed views and boarding, smooth, open design with extra elevation to protect your boat during storm surge or changing water conditions for lower level docks. Clean, simple, and built for peace of mind.

## **High Mount**

The lift tubes are mounted higher above the dock, offering the elevated clearance of a traditional-style lift with all the modern benefits of ShoreStation's hydraulic system—speed, strength, and smooth, reliable operation.

## **Boathouse**

Custom-fit for covered protection. Whether deck-over, under-deck, low-profile, side-mount, high-mount, ShoreStation lifts can be tailored to your boathouse setup. Choose the mounting style that fits your needs—all with the same trusted performance, clean aesthetics, and boat-first design.

Defy convention, and push technology to the limits...

# Boats are changing, lifts are changing with them.

Our unique hydraulic lift design allows you the freedom to choose how you experience owning a lift. The benefits of ShoreStation's Permanent Lifts are endless. With features that allow for greater flexibility in dock design and lift placement, your ShoreStation is key to complementing your waterfront view.

## SOLAR BATTERY CHARGING SYSTEM

ShoreStation's optional solar-powered systems harness the sun's energy to power your boat lift, making your lift more cost-effective, efficient and maintenance-free. The speedy 20 watt charger features a solar regulator to prevent battery drain and damage caused by overcharging.

## Hydraulic Lift Mechanism

ShoreStation's lifting mechanism contains only hydraulic components inside—rather than electrical—making it far superior for a marine environment and giving it the ability to be installed close to the waterline.

## Sturdy Boat Supports

Pivoting maintenance-free aluminum/poly bunks are mounted on sturdy support channels and conform to the boat's hull to shoulder the load.

## Remote Hydraulic Power

Powered remotely via hydraulic hoses allowing the DC power unit to be mounted far from the lift. Gone are the days of electrical components near the water.

## No Winding Cables

Pulling cables with hydraulic cylinders – rather than winding – eliminates bird nesting issues with slack conditions. With the cable position remaining fixed while lifting, the platform can be installed close to the deck.

***“Best on the market in terms of speed, ease of installation, low maintenance, and reliability.”***

***ShoreStation Owner - Rockport, TX***

# Where convenience & confidence, align.

Customize your lift  
for easy docking

Our easy-to-use accessories put control and convenience right at your fingertips, making docking easier and more secure—guides, stops, and lighting that simplify loading and ensure precision every time.

MAKE DOCKING  
EASIER TODAY

## Boat Guides

Our extensive line of poly covered loading aides help guide and center your craft in the lift, holding its position against wind and waves until the platform rises.

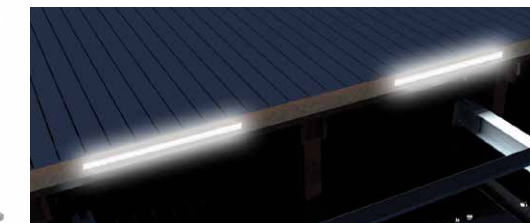

## Boat Stops

Bring your boat to a stop in the perfect position every time. These bow and motor stops will help prevent your boat from overrunning the lift.

## Lighting

**LED STRIP LIGHT KIT -**

Two 39", super bright, 24V light strips are mounted on the lift's tube or pilings for safety at night. Effortlessly controlled using your lift's wireless remote.

**REVOLUTION™ CANOPY:**  
**STORM-READY BY DESIGN**  
 • 70 MPH Protection – Fully Deployed  
 • 170 MPH Rating – Storm-Prepped

## REVOLUTION Series Canopy

Eliminate the folding, lifting, and tugging with our 'Roll and Store' canopy design. Simply unroll, cover the frame, and lock into place with our patented locking system for a taut, fully secured canopy.

**MORE PROTECTION AND COVERAGE** - The deep 20" rigid canopy frame and 7' ShoreScreen gives you complete protection from the elements with nearly 9' of vertical coverage. The trussed side frame provides strength and durability, along with the classic appearance ShoreStation canopies are known for.

**PREMIER TEXTURED COVER** - Our canopy cover features a vinyl-coated polyester fabric for long-lasting protection, durability, and weatherproofing. The waterproof textured matte finish provides the rich look of fabric with the unmatched durability of vinyl.

### AVAILABLE SIZES

Length: 12 - 48 ft  
 Width: 100 - 192 in

### VINYL CANOPY COVER COLOR OPTIONS

DEEP SEA BLUE NORTHWOODS GREEN SAND BEIGE SLATE GRAY BLACK

## ShoreScreen

*Boat Protection Made Effortless*

- ✓ **PROTECTS FROM UV DAMAGE**  
 Reduces fading, cracking, and wear.
- ✓ **BLOCKS DEBRIS**  
 Keeps leaves, birds, dust, and dirt off your boat.
- ✓ **PUSH-BUTTON CONVENIENCE**  
 Screen deploys or retracts in seconds.
- ✓ **WIND-PERMEABLE MESH**  
 Allows airflow while deflecting harmful elements.
- ✓ **CLEAN AESTHETIC**  
 Keeps your boathouse neat and organized—no flapping covers or clutter.

**360° Protection**

Fully unrolled, the curtain is 7 ft long

### WIRELESS OPERATION

12V DC motors use the boat lift battery and are controlled with the same remote as your lift.

### MODULAR DESIGN

Curtain panels mount directly to boat house roof or side of pilings with adaptable brackets (included).

**Custom sizes available to fit your boathouse.**

**SHORESCREEN:**  
**SMART STORM PROTECTION**  
 • 70 MPH Rating – In Use  
 • 170 MPH Rating – Storm-Ready

# Built for the storm.

## Hurricane-ready

*When storms threaten, peace of mind comes standard with ShoreStation. Designed with simplicity, strength, and smart engineering, ShoreStation offers unmatched protection before, during, and after a hurricane. Our system is engineered for resilience, safety, and ease of use—so you're always one step ahead of the storm.*

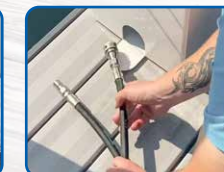

**CRADLE LOCKS OR STRAPS NOT REQUIRED** - Our lift cradle raises all the way to the bottom of the lift tubes, eliminating sway. No need for locking systems or strapping the cradle to pilings—one less thing to worry about when time matters most.

**NO MOTORS OR ELECTRICAL COMPONENTS ON THE LIFT ITSELF** - Unlike other systems, ShoreStation lifts have no vulnerable electrical parts on the lift. Even if submerged during storm surge, your lift remains intact and should still function post-storm.

**SMART POWER UNIT PLACEMENT** - The hydraulic power unit (motor & reservoir) can be installed away from the lift—on rafters, near the home, or in another elevated, protected location.

In flood-prone areas, simply quick-disconnect the unit before the storm, store it in a safe place, and reconnect it after. It's that easy to restore function without costly repairs.

**OPERATES WITHOUT SHORE POWER** - With our DC motor, ShoreStation lifts don't rely on traditional shore power. Even if the dock loses electricity after a storm, you can still raise or lower your boat. That independence is critical when access and response time matter most.

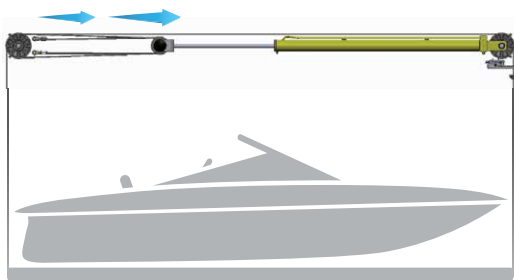

# Compare the features and discover why ShoreStation is a far superior value!

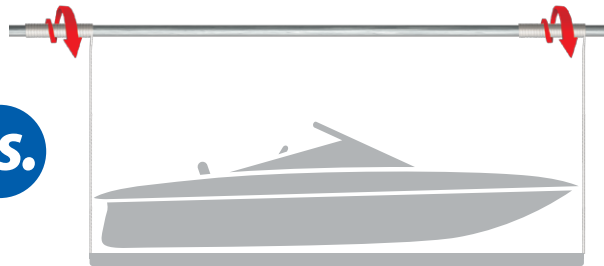

Our revolutionary hydraulic design utilizes DC power to provide the fastest lift speeds on the market. Cables cannot be overwound or unspooled maximizing cable life, safety, and your time spent on the water.

**The result...the fastest, safest, most reliable boat lift on the market!**

Cables pulled, not wound

VS.

Cables wound around pole or winch drum

ShoreStation Hydraulic	Comparison Chart	Traditional Cable Winder
Up to 96" per minute*	Speed	Up to 40" per minute
Cannot overwind or unspool	Cable Protection	Easily unspool if cable goes slack
Safe reliable DC with solar panel plug into charger	Power Source	AC circuit required
15/6/3 year manufacturer's warranty	Warranty	1 year
Hassle-free cable design, corrosion resistant materials, stainless cables and hardware	Maintenance	Annual inspections, cable greasing, re-string cables
Tandem pump auto levels	Level Lifting	Manual intervention to keep level
1 Key FOB remote standard or app	Wireless Operation	Unavailable or upcharge
Corrosion free poly/aluminum UltraBunks conform to hull	Bunk Support	Rigid carpeted wood bunks

*\*Speed varies by model and load*

# Performance-Driven Freestanding Lifts

## ShoreStation Boat Lifts

Whether you're looking for one of the safest, most dependable lifts on the market like the ShoreStation Hydraulic Lift, or the simplicity of our original manual drive lift, ShoreStation continues to elevate the industry standards.

Made from the highest quality materials, our innovative hydraulic boat lift is one of the fastest and safest lifts on the market today. When you have a hydraulic lift, there's no need to worry about wind and waves getting in your way. Freshwater or saltwater, this lift will give you confidence to safely land and secure your boat in less than ideal conditions.
